

Electronic Certificate

Version: 0 . 2

Document Number: CV-GB-2300061

Document Name: Termination of Collaborative Working Project

Originating Market: United Kingdom

Product /
Therapeutic Area: Cardiovascular

Type: Material

Subtype: Joint Working

Classification:

Promotional / Non- promotional: Non-Promotional

Certification Statement

We certify that the final electronic form of this material is in accordance with the regulations set forth by the health authority for the country of this document, and is a fair and truthful presentation of the facts about the product.

Role	Signature
Role: Final Signatory Task: Final Signatory (Certification) Outcome: I certify that the above statement is true	Name: Asheel Patel (patela64@bms.com) Date: 22-Feb-2023 14:51:41 GMT+0000 Statement: I certify that I have examined this item in its final electronic form and confirm that in my belief it is in accordance with the requirements of the relevant regulations relating to advertising and the ABPI/IPHA Code of Practice (as appropriate), is not inconsistent with the marketing authorization and the summary of product characteristics and is a fair and truthful presentation of the facts about the medicine.

Chelsea and Westminster Hospital NHS Foundation Trust and Bristol Myers Squibb (BMS) on behalf of BMS-Pfizer Alliance working on a collaborative working project to maximise the opportunity to identify patients at risk of atrial fibrillation (AF) through the deployment of a machine learning tool.

“Termination of Collaborative Working Project”

Chelsea and Westminster Hospital NHS Foundation Trust and Bristol Myers Squibb Pharmaceuticals Limited (BMS) on behalf of BMS-Pfizer Alliance entered into an agreement to deliver a collaborative working project. This project aimed to maximise the opportunity to identify patients at risk of atrial fibrillation (AF) through the deployment of a machine learning tool in development by BMS on behalf of BMS-Pfizer Alliance and referred to in the project as “Pulse AI”, or the algorithm.

BMS on behalf of BMS-Pfizer Alliance’s development of the machine learning tool was ceased through the duration of the project and as such, the objectives of the project could not be completed.

Therefore the collaborative working agreement was terminated effective 22nd July 2022.

This project was active from July 2021 and was terminated in July 2022.
