

Research & Early Development Postdoctoral Fellowship

Accelerate your career

careers.bms.com

Advance Your PhD Degree.

The Research & Early Development Postdoctoral Fellowship Program offers PhD graduates opportunities to develop their scientific research scientists at Bristol Myers Squibb. Postdoctoral fellows will have opportunities to work on breakthrough scientific ideas that have the potential to transform future drug discovery. Fellowships will have a strong emphasis in:

- Investing in de novo research and new technology that drive R&D for which there is little experimental precedent
- Publication and opportunities to further strengthen our connections with the academic community
- Creating a community of deep learning through a mentorship program and Annual Summit
- Exposing the most curious minds and expertise that can realize new discoveries

- PhD required
- 3 year program
- A resume, reflecting relevant subject matter expertise, is also required to support an application to the program

Transforming patients' lives through science™

When you join Bristol Myers Squibb, you become part of our bold vision to transform patients' lives through science. We believe in the power of science to address some of the most challenging diseases of our times. In oncology, hematology, immunology and cardiovascular disease – and one of the most diverse and promising pipelines in the industry – each of our passionate colleagues contribute to innovations that drive meaningful change. In everything we do, with every hire we make, we aspire to realize this goal.

We invite you to visit careers.bms.com to learn more about our internship, development and co-op programs.
